# METHODOLOGY

## The Purpose

The United States Department of Health and Human Services requires state agencies that administer Childcare Block Grant Funds to collect information on childcare market rates. To meet this requirement, the Research and Evaluation Unit of the Missouri Department of Social Services, on behalf of the Early Childhood and Prevention Services Section of the Children's Division, conducts a survey biannually that contains information about rates, as well as subsidized payment issues and other statistics.

## The Sample

The Missouri Department of Health and Senior Services, which is responsible for licensing childcare facilities, provided a list of all licensed facilities. In August 2006, surveys were mailed to 3,907 licensed. Forty-one (41) were returned as undeliverable. A total of 1,819 questionnaires were returned, for a return rate of 46.5%. Of the 1,819 returned, 1,774 (97.5%) were usable. Forty-five (45) could not be used for various reasons: 40 were Head Start centers, and 5 were invalid for other reasons.

## The Survey

The survey sent to the childcare providers covered the following topics:

- the location where care is provided; i.e., private residence, church, school, or commercial facility;
- rates charged for care differentiated by age groups (Infant, Preschool, and School Age<sup>1</sup>), type of facility (Family, Group, or Center), category (full-day, half-day, or part-day<sup>2</sup>), and whether care was provided during daytime/weekday hours or evening/weekend hours;
- the number of children cared for in each age group, type of facility, and category;
- whether the provider offers discounts for multiple children in a family;
- whether or not the provider is accredited;
- whether or not the provider accepts state subsidy payments;
- employees and their salaries<sup>3</sup>; and
- performance of the Department of Social Services with respect to prompt and accurate payment for children receiving state subsidy.

---

<sup>1</sup> Infant is defined as under 2 years old; Preschool as 2 to 5 years old; and School Age as 5 years and over.

<sup>2</sup> Full-day is 5 or more hours; half-day is 3 to 5 hours; and part-day is less than 3 hours.

<sup>3</sup> Information was gathered only for facilities that employ staff in addition to the proprietor.

## **Data Cleansing**

Providers were asked to report rates in full-day, half-day, and part-day increments. Providers were also given instructions for converting weekly and monthly rates to daily rates. In spite of this, many providers still reported hourly, weekly, or monthly, rather than daily, rates. Whenever possible these were converted to a daily format by dividing weekly rates by five and monthly rates by 22. Rates derived in this manner were checked for reasonableness in light of the type of care provided and the area of the state in which the care was provided. Hourly rates proved nearly impossible to convert because it is not known how many hours a child would be in care. For instance, full-day care could be anywhere from five to nine hours. Therefore, hourly rates were generally coded as missing data.

## **Type of Facility**

Facilities were divided into three groups depending on the number of children receiving care.

- Centers serve 20 or more children.
- Group homes generally serve between 10 and 20 children.
- Family homes serve fewer than 10 children.

Where possible the classification was determined by matching the facility information to Department of Health files. When this was not possible, the number of children served, as reported by the provider in the survey, determined the type.

## **Determining Market Rates**

Surveys returned with no rate for a given category of care had no influence on calculating rate information for that type of care. Because of this, the total number of surveys for each type of care and classification varies depending on the number of providers that reported a rate for that type of care.

Caution should be used in interpreting results where there are few responses in a given geographical area or for a certain type of care. This is especially true with respect to Group Homes. Also, keep in mind that voluntary participation introduces the potential for self-selection bias. With respect to this particular survey, providers charging more than DSS rates may have a perceived incentive to return the survey in the hope of influencing state paid rates. Providers charging below or close to the DSS rates may be more satisfied and, therefore, have less incentive to respond. In addition, only licensed and license-exempt providers were surveyed. It is uncertain how the inclusion of unlicensed providers may have affected the results.
